GREEK COLONY AND PROSPECTS FOR SUCCESS

Chances Are That Artesian Water Can Be Secured; If So All is Well.

The reported sale of 50,000 acres of land surrounding Candelaria station, on the Mexican Central railroad, 48 miles south of El Paso, and the statement that there is to be a colony established there, is very interesting news to people who know the long stretches of country south of here on which in most places absolutely nothing in the way of development has been done.

After leaving Juarez, across the river, there is nothing for some miles but land covered with scant brush, and soon the railroad strikes into the mesa, which looks ever more than the plains, and after a time comes the san dun country, which is composed of white drifting sand. Coming to Samalayuca a few cattle are seen and the remains of a soap factory in fast falling adobe walls. Ten or fifteen miles south of Samalayuca begins the first good looking grass country and at Candelaria the country is looking its best. East of the station of Candelaria stretches for 12 or 15 miles a great plain, covered with grass, some of it the famous grama variety. Between Samalayuca and Candelaria there are no wells so the depth to water is not known, but a few miles south of Candelaria there is a well, on Escobar Hermanos Kilo ranch. The water in that well is 200 feet deep. Four or five miles farther on the same people have another well, about two miles south of the railroad, at the ranch called Roma. The water is about the same depth as at Kilo, probably a little less. The next ranch going south on the railroad is the Burke place, on which there are some wells, and the water is found at lesser depths until the San Jose ranch is reached, and there is the lake of that name to which the whole valley drains. At Ahumada is found artesian water.

It will be interesting to watch the development of this new colony. It is possible that artesian water be struck on the plain east of the station at Candelaria, but failing in that, water could be pumped for domestic use and the ranch devoted to dry farming and dairying. We hope the new colonists will make a success of it, and thereby make a breach in the dead level of nothing doing which exists for 100 miles south of El Paso on the Mexican Central. If the country south of El Paso can get started on the lines of development it will mean much increase in business for El Paso, for there is nothing but truth in the statement that when anything is needed in the country south of here it is bought in El Paso, from a needle to a steam engine.

MINING AND OIL NEWS.

MANY RICH MINES IN LORDSBURG DISTRICT

New Era Drowned for Copper Camp First Discovered in 1870.

Lying well within the productive mineral zone of the desert region of the southwest, says Prof. Fayette A. Jones, is the Lordsburg mining district, New Mexico, which had its early day attractions centered about the historic village of Shakespeare. Later came the Pyramid camp a few miles further to the south.

The Lordsburg mining region lies immediately south of the village of Lordsburg and embraces the low, short desert range of the Pyramid mountains, lying between the S. P. railroad on the north and the E. P. & S. W. railroad to the south.

In 1870-1 there was a great excitement over the alleged discovery of diamonds, samples of which were sent to San Francisco. A company was formed and stock sold, but the property had been "salted."

In 1880 the S. P. railroad was completed to Lordsburg and a good excitement sprang up and the old Ralston camp, with its name changed to Shakespeare, had a great boom. During the early 80s a great deal of work was done and the Lordsburg district was a steady and profitable producer.

In 1898 a new mining era came to Lordsburg when the El Paso crowd moved over the Superior mine and began shipping high grade copper. Today it is a steady shipping camp.

There appears to be two general types of veins or zones in which the metals have segregated: (1) Fissures, (2) Shear or shattered zones. The deepest workings in the districts, some of which are over 400 feet, show continuity of pay ore. The district is one of the best proved up mineral sections of New Mexico. The oxidized zone reaches a great depth. Below the 300 foot level the ores are becoming better. The economic ores are copper, lead, silver and gold. While at present it is looked upon as a copper camp its gold and silver values are considerable.

OJUELA MINES PAY HANDSOME DIVIDEND

\$100 Per Share of \$100—Improvements Are Contemplated.

Torreon, Mex., June 15.—The Penoles Mining company, operating the big Ojuela mines, near Mapimi and the large smelter at that place, has announced a dividend of \$100 per share.

Jell-O Ice Cream Powder

Makes Ice Cream for one cent a plate

RECIPE: Stir the powder in a quart of milk and freeze. Nothing more to be done. Everything is in the package. Makes two quarts of delicious Ice Cream in 15 minutes. Vanilla, Strawberry, Lemon, and Chocolate flavors, and Unflavored. Two packages 25 cents at grocers'. Recipe Book Free. The Genesee Pure Food Co., Le Roy, N. Y.

Dr. Lyon's PERFECT Tooth Powder

neutralizes the destructive acids of the mouth—cleanses, preserves and beautifies the teeth, and imparts purity and fragrance to the breath.

announced a dividend of \$100 per share, payable this month. This is the amount of the par value of their stock. The payment of dividends is to be made from the house of Bermejo & Company, in Mexico City. This is one of the largest dividend paying mining companies in Mexico.

LA REPUBLICA MINING COMPANY MAKES REPORT.

May Workings Results in Big Run of Bullion—Some Mining Being Rapidly Unwatered.

During the month of May the La Republica Mining company's stamp mill in Sonora worked 12 days, crushing 258 tons of ore in an average assay of 58 ounces silver per ton and 245 tons of tailings were treated of average assay value of 47 ounces silver. The bullion produced was 24,561 fine ounces of silver. The concentrates contained 7675 ounces silver. The bullion was forwarded to Monterey.

Secretary Manford has received a telegram from Gordon Hardy, general manager of La Republica Mine, saying that the big pumps are lowering the water at the rate of ten feet per day, and that it is down to within 27 feet of the bottom at the 300 foot level; also that it would be completely unwatered before the end of this week.

HEAVY ORE SHIPMENTS FROM COURTLAND, ARIZ.

The mines of the Great Western and C. and A. mining properties in Courtland, Ariz., continue making regular shipments to the Douglas and El Paso smelters. The Great Western has received two cars in number, one of posts and one of fuel oil last week. The flow of water struck at the 300 foot level of the Mary, continues at 125 gallons a minute.

Two shifts are working steadily on the diamond drill for the Copper Queen company on the Silverton claim. A car of 20 per cent copper ore is being shipped from the C. O. D. mine to the Douglas smelter. This is owned by Drs. Hughart and Bishop, of Tombstone.

SALE APPROVED FOR MINE LOCATED NEAR LAS CRUCES.

Las Cruces, N. M., June 14.—Judge Frank W. Parker has approved the contract entered into between Frank T. French, receiver, and J. I. McCullough, secretary, of the Benson-Stephens Mining and Milling company, for the purchase of the property. Receiver French was appointed on May 6 for the company, since which time Mr. McCullough has devoted his time to organizing a new company to take over the property. Possession is to be taken on July 1, and active operations will be commenced a short time after.

COPPER CIRCUIT TO ALAMOGORDO

Tri-State Company Will Also Have Connection With Pacific Coast.

Alamogordo will have a new copper circuit telephone line to connect with El Paso as soon as the linemen can string the wire between here and the New Mexico town. Workmen of the Tri-State company are now stringing 17,000 pounds of copper wire on the Alamogordo line. This wire is being strung on the pole of the Southern western railroad line from the El Paso city limits.

The 300,000 pounds of wire for the coast extension of the Tri-State line has not yet arrived but will be strung as soon as it arrives. The line will be run by way of Deming and Benson and from there to Tucson, using the poles along the western division of the Southern western. From there the line will connect with the Consolidated Telephone company's lines to the Pacific coast, giving direct connection.

MODERN FIRE ESCAPE FOR Y. W. BUILDING

"Two Step" Innovation Affords Improvements Over the Old System.

A two step at the Y. W. C. A.? Scandalous, you say? True.

The demure misses of the local Y. W. C. A. are to have a two step at the new boarding home on Missouri street. But the two step is to be a two step fire escape.

Instead of the old kind that are an even break between staying and getting burned to death, or risking life and limb on the iron ladders, the new association building will be equipped with what contractor Valentine calls a "two step" fire escape. This means that the escape will be built like a stairway and can be used as conveniently as an ordinary stairway. The Y. W. building is now up to the third floor and still going.

MORE GALLERIES FOR MAPLEWOOD

The Maplewood apartment house on Santa Fe street, adjoining the Providence hospital, which was recently purchased by Dr. M. P. Schuster, is being improved. The gallery in front of the place is being remodelled and a second and third floor added, giving gallery floor space for each of the stories in the apartment building.

TOLTEC CLUB NEAR FINISH

The inside finish of the fifth and sixth stories of the Toltec building is now being completed and it is expected to have the entire building completed by July 1. No definite announcement has yet been made as to the time for having the formal opening of the building, although July 4th has been suggested.

SUITS for sizzle weather

Do you know how to dress for hot weather?

Needn't bother your head about it if you wear our Tropical Weight Clothes. Something about them that makes you forget the heat.

Don't swelter, just drop in and we'll show you the kind of garments to wear on days like these.

How About an Indestructo Trunk?

The Indestructo—with a broad guarantee, an insurance policy for five years against loss by fire, accident, wreck, collision, carelessness or neglect.
